

Maintain Enrollment Tab Has Fields for Recording New County/District Information for Withdrawn Students

In the Maintain function, two fields have been added to the Maintain Enrollment tab for recording information about a withdrawn student's new district. When a student has an enrollment status of **W** and the enrollment record for the withdrawal is selected for editing, the **Date Enrolled at New District** and the **County/Dist/Campus #** fields are displayed on the tab.

Date Enrolled at New District field

The screenshot displays the 'Maintain Enrollment' tab. On the left is a sidebar with the following menu items: Student Enrollment, Student Demographics, Student Contacts, Additional Student, Manage Enrollment, Additional Enrollment, Escalations, **Maintain Enrollment**, Maintain SSN/State ID, and Display Student Summary. The main area contains an 'Enrollment Record' form with the following fields: School (001), Academic Year (2008), Calendar (Traditional), Entry Date (08-27-2007), Entry Code, Grade (10), ADA Elig (Eligible For Full Day Attendanc), Withdraw Date (02-11-2008), Leave Reason (Wd To Enroll In Texas Public Sch), Date Enrolled at New District (02-12-2008), County/Dist/Campus # (111 999 001), Enrollment Status (W), and a Comments field with a 500 character limit. Below the form is an 'Update' button. At the bottom is an 'Enrollment History' section with a filter set to 'Current Year' and a table of enrollment records.

Academic Year	School	Calendar ID	Entry Date	Entry Code	Grade Level	ADA Eligibility	Withdraw Date	Leave Reason	Enrollment Status
2008	001	1	08-27-2007		10	1	02-11-2008	28	W

record count: 1 of 1

Gradebook

Enhancements to Gradebook functionality are described in this section.

Maintain Teacher Gradebook Category Enhancements Added

Enhancements to the Maintain Teacher Gradebook Category function are listed below.

- **Teacher gradebook assignments save automatically without tabbing.** Users do not have to tab out of the Assignment Name column to save the assignment information. While they can still tab to save the information, they can also save by clicking the Add button or simply navigating to another tab.
- **Gradebook Copy Assignments automatically calculates A/B due dates.** The Copy Assignments tab has been enhanced to accommodate A/B days. For course/sections associated with an A/B calendar, the system will change the due date to either one day before or after the due date of the assignment being copied, as appropriate.
- **Teachers can change the category for an assignment after it has been saved.** If teachers want to change the category to which an assignment belongs, they can do so (for example, if they enter an assignment in the wrong category). They no longer have to delete and reenter an assignment to change its category.

Gradebook Enhancements Added

The Gradebook tabs of the Enter Classroom Grading function now include the following enhancements:

- **Shaded color arcs in upper right corner indicate a student's absence status on an assignment due date.** If the color arc is blue, the student's absence is excused. If the color arc is tan, the student's absence is unexcused.
- **A Class Average row has been added to display the class average for each assignment.** If no grades have been entered for an assignment, the Class Average cell for the assignment is blank. The average includes every student who has a grade.
- **Shading has been added to assignment grade cell to indicate failing grades.** If a student received a failing grade on an assignment, the cell is shaded in red.
- **If teachers add or modify information on a Gradebook tab and attempt to navigate away from the tab without saving first, a confirmation box is displayed warning them that they have unsaved changes that will be lost if they do not save.** Users click the Save button to save the information or the Continue button to proceed with navigating away from the tab without saving. The Confirmation box is shown below.
